

Vercel Environment Variables Configuration Summary

Configuration Completed Successfully

All environment variables have been successfully configured on Vercel for the **production** environment.

Configured Environment Variables

1. DATABASE_URL

- **Description:** PostgreSQL database connection string for Abacus.AI hosted database
- **Status:**  Configured
- **Environment:** Production

2. NEXTAUTH_SECRET

- **Description:** Secret key for NextAuth.js session encryption
- **Status:**  Configured
- **Environment:** Production

3. ABACUSAI_API_KEY

- **Description:** API key for Abacus.AI platform integration
- **Status:**  Configured
- **Environment:** Production

4. NEXT_PUBLIC_SUPABASE_URL

- **Description:** Public Supabase project URL
- **Value:** `https://mbbvmtspkotbamorqkml.supabase.co`
- **Status:**  Configured
- **Environment:** Production
- **Note:** Publicly exposed (NEXT_PUBLIC_ prefix)

5. NEXT_PUBLIC_SUPABASE_ANON_KEY

- **Description:** Public anonymous key for Supabase client
- **Status:**  Configured
- **Environment:** Production
- **Note:** Publicly exposed (NEXT_PUBLIC_ prefix)

6. SUPABASE_SERVICE_ROLE_KEY

- **Description:** Service role key for Supabase admin operations
- **Status:**  Configured
- **Environment:** Production
- **Note:** Secret key - server-side only

7. NEXTAUTH_URL

- **Description:** Base URL for NextAuth.js authentication callbacks
- **Value:** `https://nextjsspace-seans-projects-eadbd219.vercel.app`
- **Status:**  Configured
- **Environment:** Production
- **Note:** Updated from localhost to production Vercel URL

8. GOOGLE_CLIENT_ID

- **Description:** Google OAuth 2.0 client ID for Sign in with Google
- **Status:**  Configured
- **Environment:** Production

9. GOOGLE_CLIENT_SECRET

- **Description:** Google OAuth 2.0 client secret
- **Status:**  Configured
- **Environment:** Production

Security Notes

- All environment variables are **encrypted** on Vercel
- Values are only accessible during build and runtime
- Sensitive keys (DATABASE_URL, NEXTAUTH_SECRET, API keys) are never exposed to the client
- Only variables prefixed with `NEXT_PUBLIC_` are exposed to the browser

Production URLs

- **Primary Production URL:** `https://nextjsspace-seans-projects-eadbd219.vercel.app`
- **Latest Deployment:** `https://nextjsspace-gjrqb20am-seans-projects-eadbd219.vercel.app`

Next Steps

1. **Redeploy the Application:** The environment variables will take effect on the next deployment

```
bash
```

```
npx vercel --prod --token ZMnDrh84StlpksMxR7iFdrcS
```

2. **Update Google OAuth Settings:**

- Go to [Google Cloud Console](https://console.cloud.google.com/apis/credentials) (`https://console.cloud.google.com/apis/credentials`)
- Update the **Authorized redirect URIs** to include:
 - `https://nextjsspace-seans-projects-eadbd219.vercel.app/api/auth/callback/google`
 - Update the **Authorized JavaScript origins** to include:
 - `https://nextjsspace-seans-projects-eadbd219.vercel.app`

3. **Test the Deployment:** Visit the production URL and test:

- Google Sign-in functionality

- Database connectivity
- Abacus.AI API integration
- Supabase features

Verification Command

To verify the environment variables at any time:

```
npx vercel env ls production --token ZMnDrh84StlpksMxR7iFdrcS
```

Configuration Date

Configured on: Wednesday, October 29, 2025

Total Environment Variables: 9

Project: seans-projects-eadbd219/nextjs_space

Status: All variables successfully configured
